Artfully Integrated Home Automation

Since 1980 DC Home Systems has designed, engineered, installed and serviced elegant home automation systems, technologies and controls.

Your system will be tailored to your precise lifestyle and will blend into your environment with aesthetic integrity.

-Learning From Experience-

Process Driven Value™

We have learned: Our customer's total cost of ownership is lower when a system is done right from the start.

It all starts with designing for our customer's preferences. We specify only proven technologies and engineer integrated solutions for performance, reliability and ease of use.

We pre-assemble and test in our facility. We work out the bugs before we arrive at your home so we can be confident and efficient during the final installation.

-Trusted Professionals-

DC Home Systems is your trusted home automation resource, providing unparalleled performance, reliability and a consistent user experience in one or all of your homes.

"You stayed close to the project, communicated with everyone, kept us informed at every stage, and delivered on everything."

"Great people, great workmanship from design through delivery and service."

"We love showing off all the cool features of our home and whenever anyone asks about the technology I will be singing the praises of DC Home Systems."

-Delighted Clients

Critical Path Project Delivery™

Our personal approach starts with assessing your needs and interests.

We aren't here to sell OUR 'stuff'. We are here to design YOUR system.

Your client advisor continues as your advocate throughout the project management and familiarizing you with using your system.

Performance Assurance™

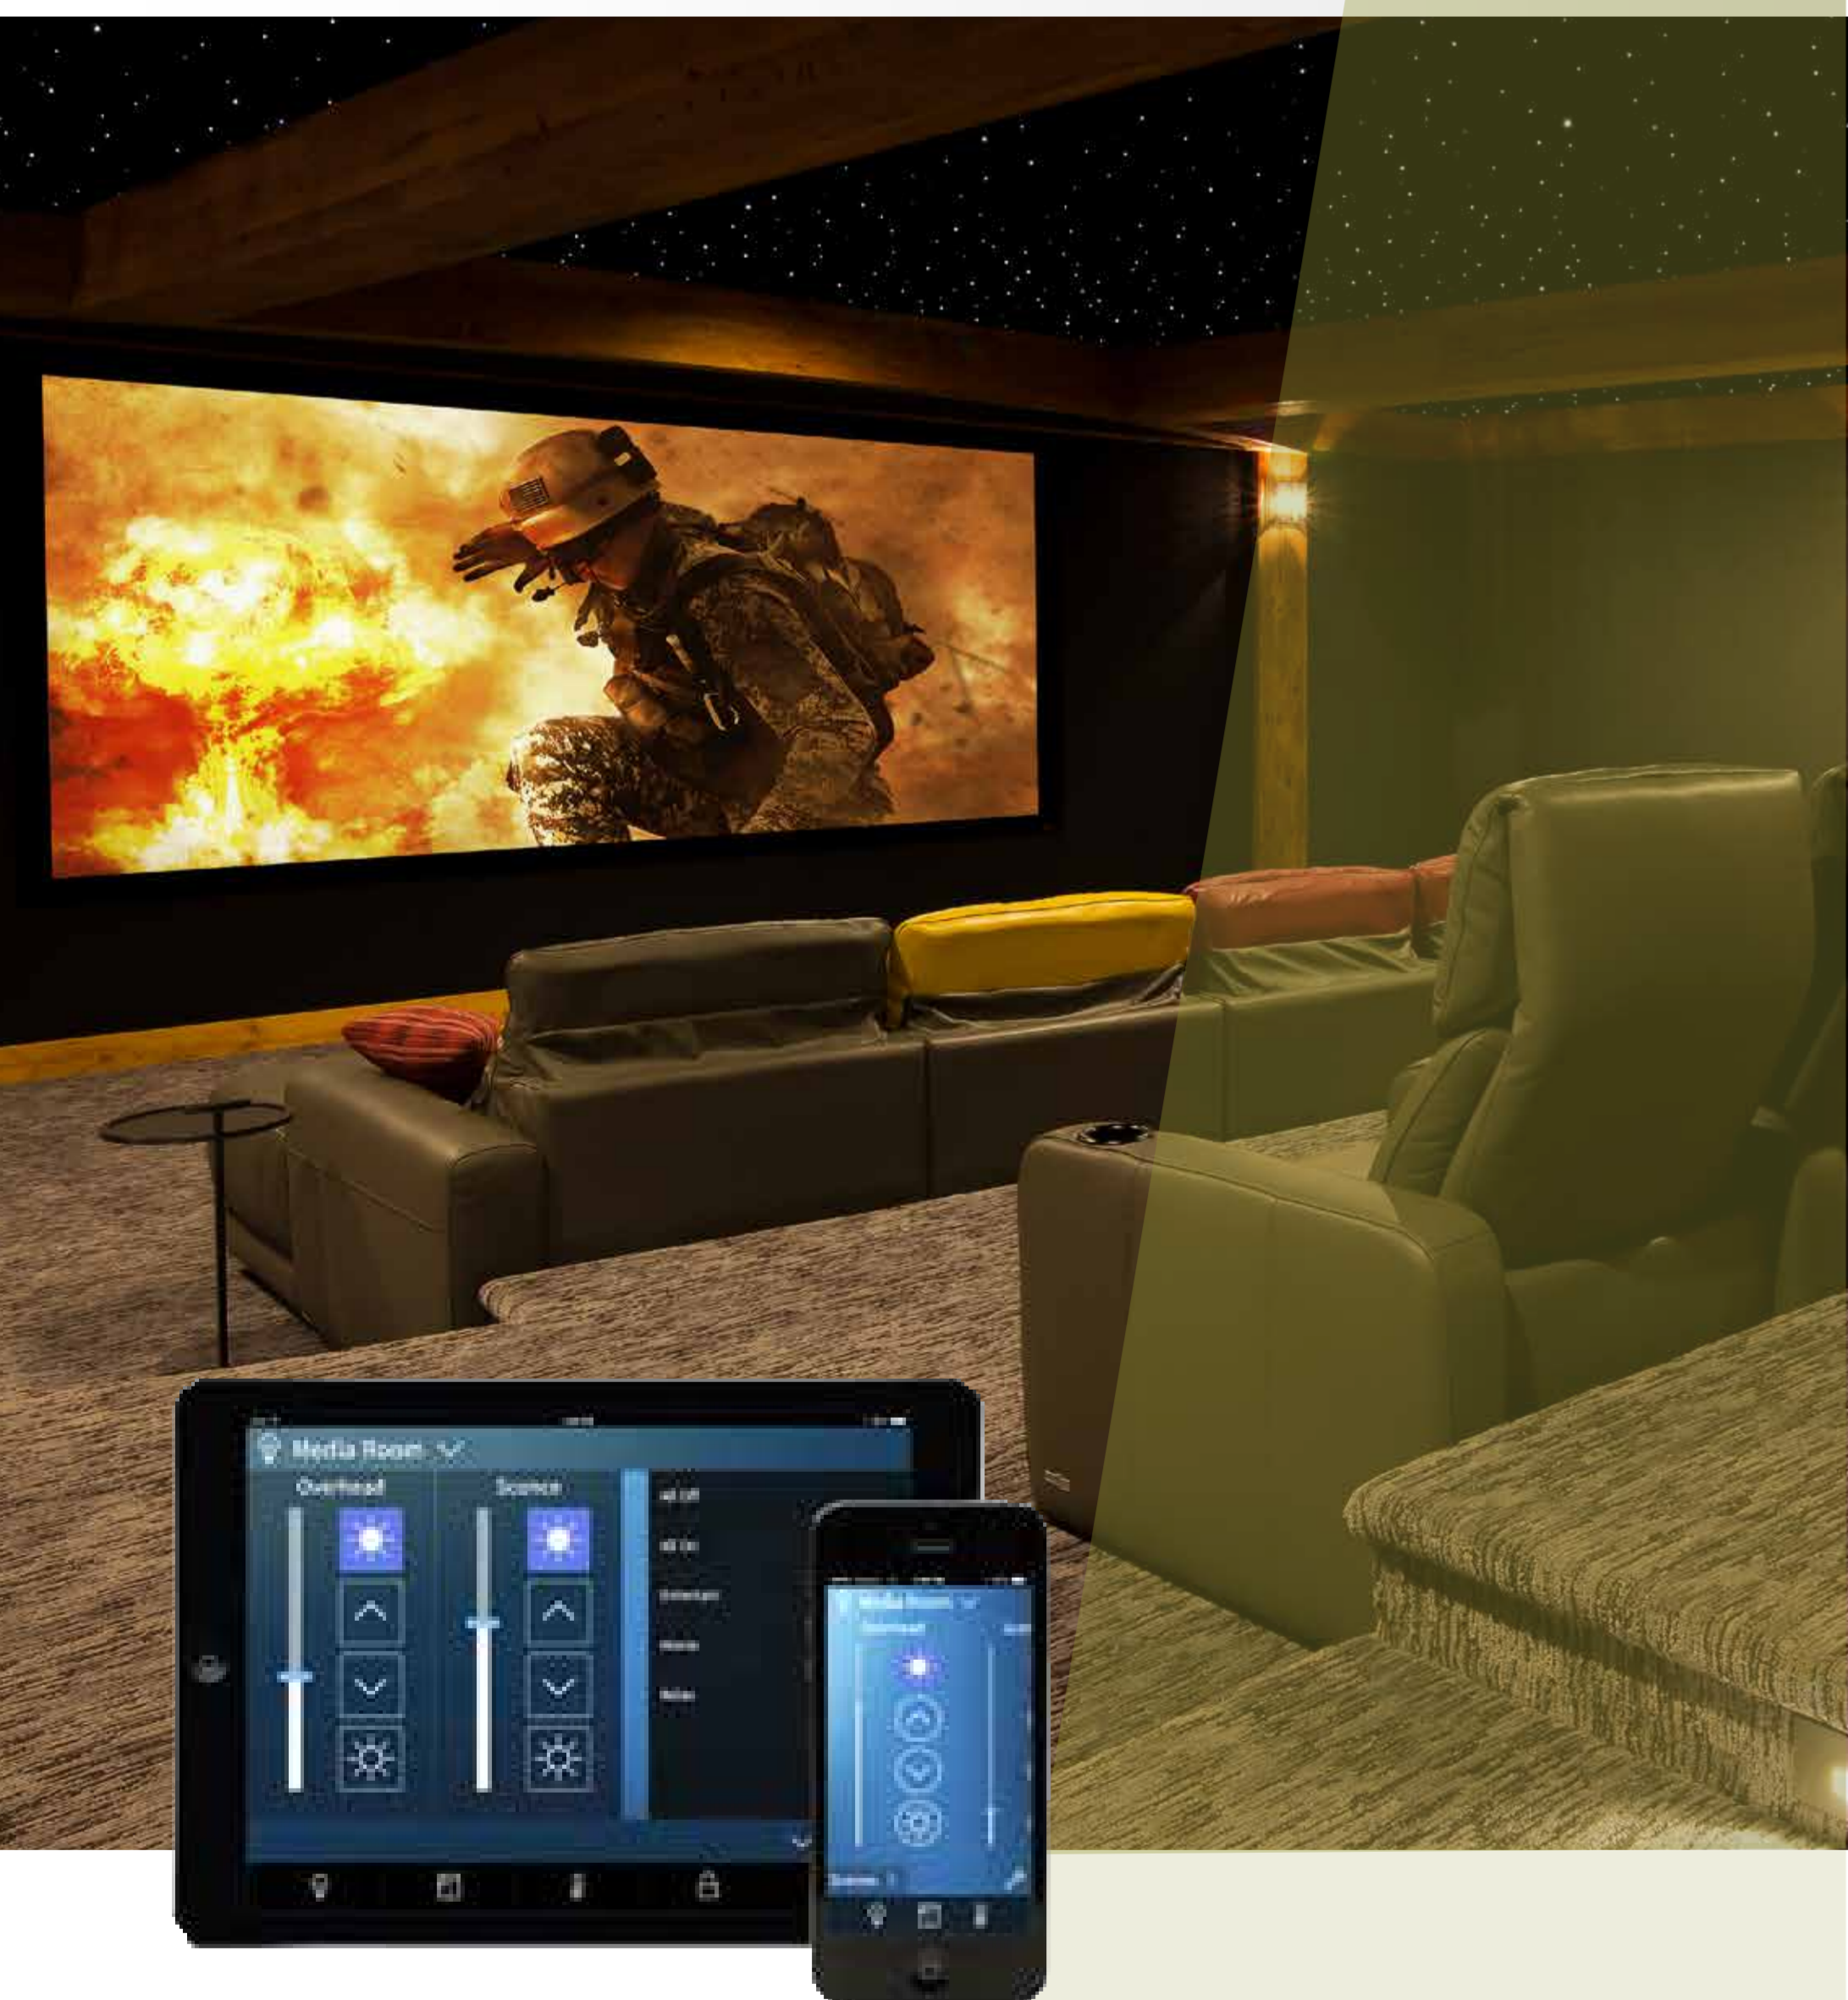

We provide proactive, responsive, ongoing attention to preventative maintenance, on sight service, upgrades and expansions.

-Our Mission-

DC Home systems has incorporated 35 years of learning and experience into our mission:

"We add value for our customers by simplifying their home experience and elevating their comfort, convenience, security and entertainment by providing the best, most reliable, aesthetically conscious and simple to use home automation systems."

Simple

Reliable

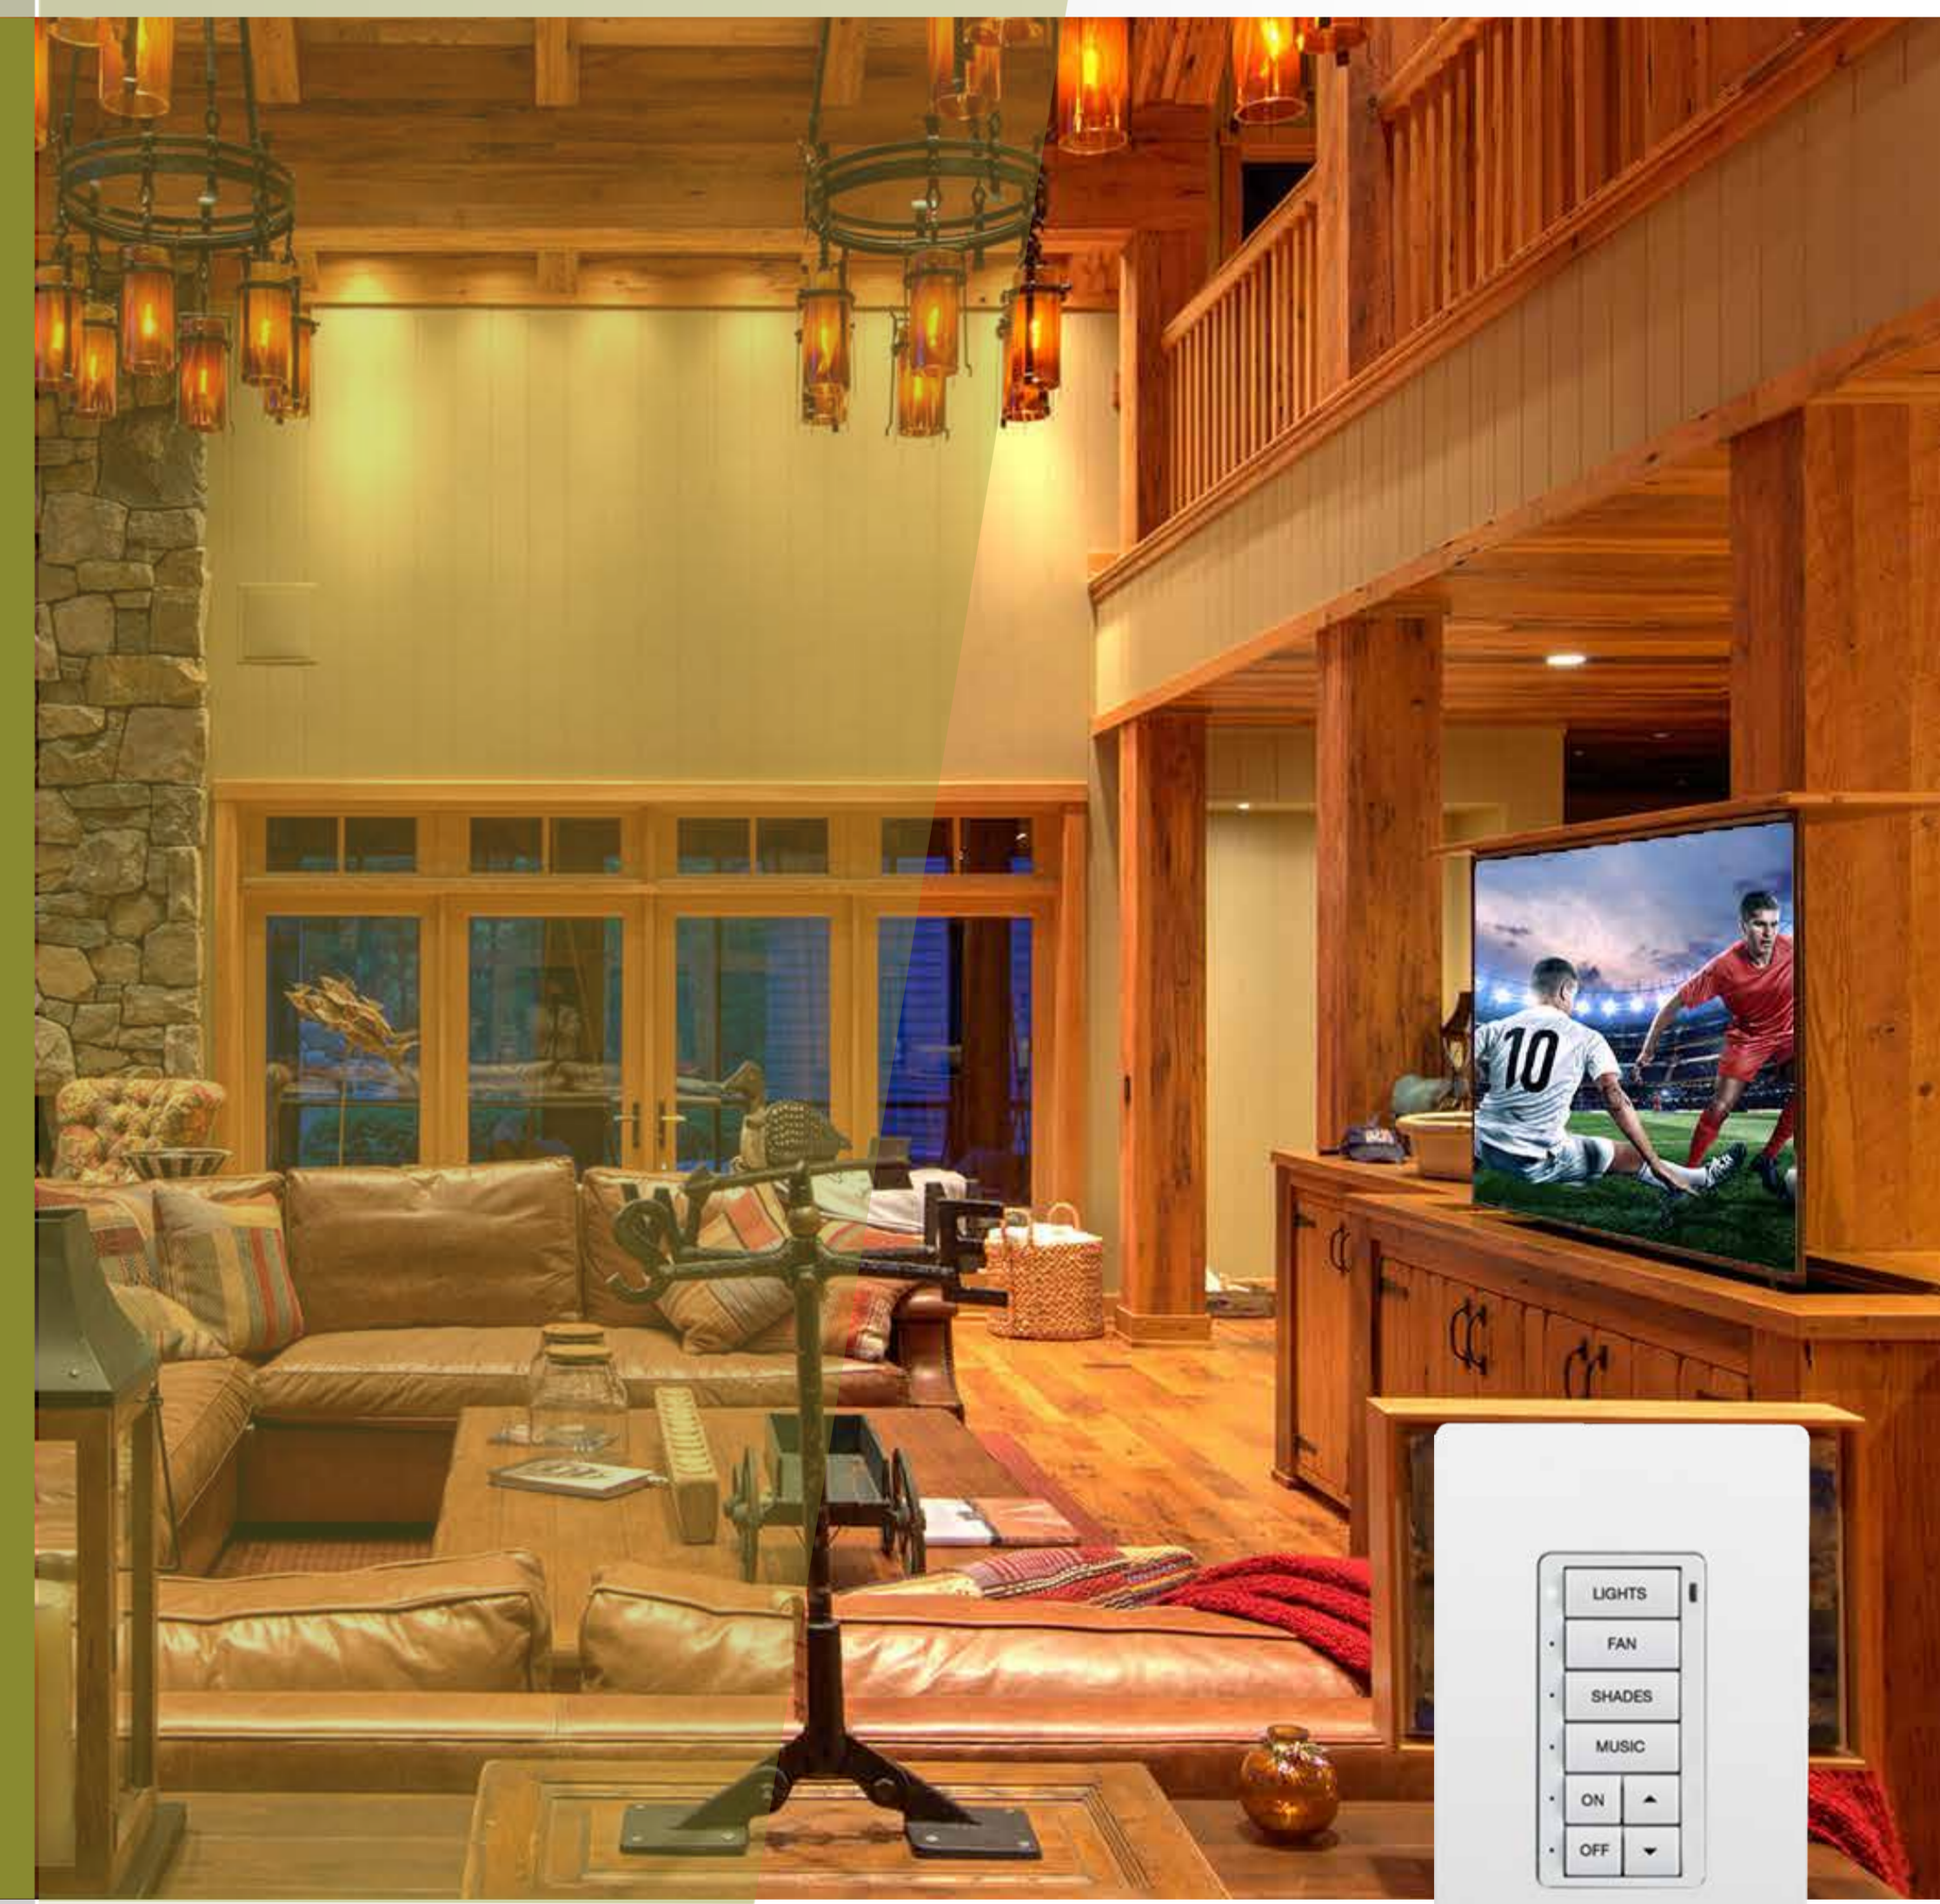

Entertainment | Music | More!

Sweet Dreams

Turn on the bedroom TV, turn off all the lights in the house, turn on the outside camera, adjust the nightlight for the kids, draw the motorized drapes and set the temperature back with the touch of one button while snuggled in your bed.

Secure

Home Away From Home

Turn up the heat in preparation for your arrival, unlock the door for your forgetful teen, check the property activity on your surveillance cameras, turn on the irrigation system, adjust the lights or motorized shades from where ever you are in the world. Owith the convenience of 1 simple control app.
